Simple & quick to install

Wifi Solution

Lighting control

ON/OFF control

Shutters control

Gate control

Functionalities

Lighting

From where you are, this module allows for controlling the lighting, turning the light on and off remotely (On/Off control).

ROW-02
Lighting control
for tow circuits

ROW-01/16A
Lighting control
for a circuit

On/Off control

This module allows remote control, turning on and off of power outlets and electrical devices, pumps, irrigation, motors, etc. (Dry-contact relays).

ROW-01/16A
ON/OFF control

Electric shutters

This module allows remote control of electric shutters while providing a feedback to check the position of the blind. (Percentage of opening/closing).

SRW-01
Shutters control

Electric gate

This module allows for opening and closing the electric gate remotely.

SBW-01
Gate controle

In one click

Manage your home, activate your scenarios

- Lighting control
- Individual control / Central control of blinds
- Gate opening
- Activation of scenarios

RNW-01
Activation of scenarios
by physical button

Module with
4 programmable inputs

Advantages

Control your home remotely

Stay in touch with your home wherever you are
and improve your comfort while saving energy

- Save energy
- Create scenarios
- Comfort gain

Operating Modes

WiFi modules can be controlled in several ways : by voice command,
via a smartphone, or using local buttons or a monitor.

Local Control
With your AKUVOX
Android Monitor

Supla

The application to control your home remotely

The SUPLA application is a home automation solution that allows you to control and manage various functionalities remotely in your connected home, such as lighting, roller shutters, electric gates, pumps, motors, air conditioning, electrical outlets, and much more. The application also allows you to create scenarios to automate and schedule certain tasks via your smartphone.
